I have been following the netns patches on this ML for a while but I
still have not figured out in which tree the patches fed to David Miller
are applied. I have attempted to grep the public trees 'davem/net-2.6'
and 'davem/net-2.6.25' but without much success so far. Is there a
public git tree I can clone which contains all the netns patches which
David Miller state are 'Applied' ?

thank you,
Mathieu
