Subject: [SOLVED!] Red Hat Enterprise Linux OS Templates
Posted by nimbus4321 on Wed, 23 Jan 2008 19:53:09 GMT

Hi,

Is a pre-created OS template cache available for Red Hat Enterprise Linux 4 or Red Hat
Enterprise Linux 5 ?
If not, is OS template metadata available for either of these ?

Note that question is specifically for Red Hat Enterprise Linux. I am aware that CentOS 4 and
CentOS 5 template cache and metadata are available, and that these are more-or-less the same.
However, I am using some third party software that is supported specifically on Red Hat
Enterprise Linux, and not on CentOS.

If neither of these are available, are there any instructions on how to create OS template metadata
for Red Hat Enterprise Linux ?

Many Thanks for any help with this.
