error: Couldn't get <http://git.openvz.org/pub/linux-2.6-openvz/refs/tags/v2.6.15-rc5> for tags/v2.6.15-rc5

Couldn't resolve host 'git.openvz.org'

error: Could not interpret tags/v2.6.15-rc5 as something to pull

I pulled and rebuilt my git so I am running the most current version.

If I put <http://git.openvz.org/pub/linux-2.6-openvz/refs/tags/v2.6.15-rc5> in my browser I can get the file.

Maybe some bug with http vs git transport?
