Hi,

Can you please describe more clearly your configuration:

- Do your VPSes use the public IPs?
- You cannot ping anything from inside the VPS and vice versa. Is it true?
- Please check the routing table?
- Check firewall rules?
- Please use "tcpdump" to look after the packets behavior.

And please if it is possible show the output of:

"ls /etc/sysconfig/network-scripts/"

Thank You!
