---

Hi all,

im currently runing

a Fedora Core 3 , i saw today there is updates for OpenVZ. this is a production system, should i update? is there any issues with the update? (Beside the fact i need reboot) problems or complications should i expect?

im currently have INSTALLED

```
[root@] [/vz] rpm -qa|grep vz
```

```
vzkernel-smp-2.6.8-022stab038.1
```

```
vzquota-2.7.0-7
```

```
vztmpl-fedora-core-4-1.0-5
```

```
vzctl-lib-2.7.0-22
```

```
vzpkg-2.7.0-17
```

```
vztmpl-centos-4-1.0-5
```

```
vzctl-2.7.0-22
```

```
vztmpl-fedora-core-3-1.0-5
```

```
[root@] [/vz]
```

Should i update?

Thank you very much.
