
Subject: fake swap != 0 in VE?

Hi there ...

I'm running a software here, inside a VE,
that checks the amount of available swap
and complains if it thinks there isn't
enough.

The VE has plenty of RAM, swap will *never*
be used. But there are lots of popups about
missing swap all the time. :-(

Running 'free' in the VE shows no swap. Can
I fake some swapspace to prevent the popups?

Thomas
