Subject: fake swap != 0 in VE?

Hi there ...

I'm running a software here, inside a VE,  
that checks the amount of available swap  
and complains if it thinks there isn't  
enough.

The VE has plenty of RAM, swap will *\*never\**  
be used. But there are lots of popups about  
missing swap all the time. :-(

Running 'free' in the VE shows no swap. Can  
I fake some swapspace to prevent the popups?

Thomas
