smsprog,

1. I personally don't recommend using reiserfs :/ We had enough "fun" supporting this But if you use it, don't forget to report problems to Linux Kernel Mailing List (LKML), to make people aware of it's bugs (as we are very unlikely to be able to help with reiser).

2. about time. Do you have AMD or Intel? Can you check if time is going fast/slow during the day? If it is noticable, try booting with 'noapic' or 'clock=pmtmr'.
