Subject: Re: OpenVZ - allocation failed: out of vmalloc space
Posted by vaverin on Tue, 12 Feb 2008 11:28:41 GMT

Hi, Stuart!

Please try to stop services (i.e. vz, iptables, network, sound) -- it can lead to remove some modules.

Then please use rmmod for removing unused modules (it have '0' in 'Used by' clomn showed by lsmod).

After each attempt please look at current Vmalloc consumption (in /proc/meminfo file).

thank you,
Vasily Averin
