We're extremely motivated to add a few Senior level virtualization experts to our systems administration and product development teams immediately. We would prefer you move to Seattle, Washington, USA -- but this is open for negotiation.

We're looking for developers and engineers that have experience with large scale deployments of Vz/OpenVZ/Xen/VMware.

Spry provides a flexible work environment where you will have the opportunity to explore new skills, be a key contributor to a knowledgeable and responsive team, and gain experience in the rapidly growing virtual private server hosting industry.

Please send you resume to cooljobs@spry.com
