Hi,

your script will be executed with parameters.

I tried this to find them out:

```
mrwhite:/# cat /etc/vz/vznet.conf
EXTERNAL_SCRIPT="/opt/sbin/vznetaddnet"
```

```
mrwhite:/# cat /opt/sbin/vznetaddnet
#!/bin/bash
echo $@
```

and while startup this prints:

```
init veth veth101.10
```

```
init veth veth101.20
```

bye,b52
