Subject: Re: Kernel 2.6.20+ ?
Posted by vazir on Sun, 17 Feb 2008 16:44:10 GMT

That would be just great to have any idea when the 2.6.24 kernel would be usable, since 2.6.18 is too outdated, and does not support modern chipsets for Intel/core CPU's. Nvidia chipset motherboard for multicore Athlon64+ works, but sometimes hangs. . Using 2.6.22 kernel is a little uncomfortable, since marked nonstable...
