Subject: [PATCH 0/17] Finish IPv4 infrastructure namespacing. Posted by den on Tue, 19 Feb 2008 07:28:36 GMT View Forum Message <> Reply to Message

This set finally allows to manipulate with network devices inside a namespace and allows to configure them [via netlink]. 'route' is not yet supported (but prepared to) as it requires a socket.

Additionally, better routing cache support is added.
