hello
yes
i have the following rare problem

everyday at fixed time around 12:22-1:30 am
i see some ports begins to fail in all VEs for example i cannot connect to cpanel running on all
vpses at once
i then see the oops i posted earlier
the problem is fixed when i do service network restart on main HW node and then restart network
on each ve then restart cpanel itself
by the way i get the following error when i try to restart network service on a ve
Shutting down interface venet0:   [OK]
Shutting down loopback interface: [OK]
Setting network parameters: error: unknown error 1 setting key 'kernel.sysrq'
net.ipv4.ip_forward = 0
net.ipv4.conf.default.rp_filter = 1
net.ipv4.conf.default.accept_source_route = 0
error: unknown error 1 setting key 'kernel.core_uses_pid'
                                    [FAILED]
Bringing up loopback interface: [OK]
Bringing up interface venet0:   [OK]

however no error when restarting network service on main hw node

also i have strange problem on hw node
its that when i restart iptables the server fails offline and unconnectable either immediately or few
seconds after restarting iptables however i tried reinstalling iptables

please advise
