Subject: Re: amavis Net::Server: Accept problem (was:Re: Numflock UBC error -Pls help) Posted by joelee on Mon, 25 Feb 2008 18:42:05 GMT View Forum Message <> Reply to Message

Curx, thanks for the info... I didn't think its a openvz specific problem. But, the problem is that openvz UBC reports failent and when I try to use vzcfgvalidate it reports success. I've just posted a separate thread about the use of the vzcfgvalidate tool. For me, its use has never worked? But, I did double the Numflock UBC resource and it looks a bit stable now. I am monitoring to see if it stays quite. Thanks for your help though!!!

Joe
