---

```
[root@centos5_1 /]# chkconfig --list | grep httpd
httpd          0:off 1:off 2:on 3:on 4:on 5:on 6:off
```

it shows that it is supposed to be on in level 3

i did `chkconfig --level 2345 httpd on`

and nothing changed

I have tried this on centos and fedora templates.  
thanks

Edited:  
It started automatically after 10 minutes (that happened several times before)
