Look into /etc/vz/vz.conf:

```
## Defaults for VEs
```

```
VE_ROOT=/home/vz/root/$VEID
```

```
VE_PRIVATE=/home/vz/private/$VEID
```

```
CONFIGFILE="vps.basic"
```

```
DEF_OSTEMPLATE="centos-4"
```

The config file used in this case is /etc/vz/conf/ve-vps.basic.conf-sample
