hi all,

my init logging patch works so far, but unfortunately it breaks checkpointing:

```
-----  
>vzctl chkpnt 101  
Setting up checkpoint...  
suspend...  
dump...  
Can not dump container: Invalid argument  
Error: d_path err=-22  
Checkpointing failed  
-----
```

Maybe some of the developers can give me a hint whats wrong?

ls of shows (16531 id the logging process)

```
lt-vzctl 16531 root cwd DIR 0,22 4096  
1226401 /var/lib/vz/root/101
