hi all,

my init logging patch works so far, but unfortunately it breaks checkpointing:

```
-----  
>vzctl chkpnt 101  
Setting up checkpoint...  
    suspend...  
    dump...  
Can not dump container: Invalid argument  
Error: d_path err=-22  
Checkpointing failed  
-----
```

Maybe some of the developers can give me a hint whats wrong?

ls of shows (16531 id the logging process)

```
