hi all,

my init logging patch works so far, but unfortunately it breaks checkpointing:

>vzctl chkpnt 101

Setting up checkpoint...

suspend...

dump...

Can not dump container: Invalid argument

Error: d_path err=-22

Checkpointing failed

Maybe some of the developers can give me a hint whats wrong?

ls of shows (16531 id the logging process)

```
lt-vzctl 16531    root cwd    DIR        0,22   4096
