Yes, the output of ulimit -a is:

```
core file size      (blocks, -c) 0
data seg size      (kbytes, -d) unlimited
max nice           (-e) 0
file size          (blocks, -f) unlimited
pending signals    (-i) unlimited
max locked memory  (kbytes, -l) unlimited
max memory size    (kbytes, -m) unlimited
open files         (-n) 1024
pipe size          (512 bytes, -p) 8
POSIX message queues (bytes, -q) unlimited
max rt priority    (-r) 0
stack size         (kbytes, -s) 8192
cpu time           (seconds, -t) unlimited
max user processes (-u) unlimited
virtual memory     (kbytes, -v) unlimited
file locks         (-x) unlimited
```

I tried to stop 15 VEs, but it seems that the output of it does not change.

Thanks!
