Subject: Has anyone run more than 49 VEs?
Posted by yoolee on Wed, 12 Mar 2008 19:44:32 GMT

Hi,
I am using 2.6.18-fza-028stab051.1-686-bigmem kernel on a Debian 4.0 host.
I can not start more than 49 VEs, I have read many documents which talk about running hundreds of VEs using OpenVZ. I am wondering why I can't get there.
I appreciate your help.
