Subject: accessing "nonexistent" /proc/<tid>/ Posted by Miklos Szeredi on Thu, 13 Mar 2008 12:25:01 GMT View Forum Message <> Reply to Message

Jean-Pierre noticed, that it's possible to access any task through /proc/<tid>/, not just the thread group leader.

Is this intentional? I can't find it documented anywhere, but it's definitely a useful feature. So maybe it's worth making it officially part of the kernel interface, and adding a note to Documentation/filesystems/proc.txt?

Miklos
