
Subject: Centos 5 6 gigs of ram not working
Posted by [gnuyoga](#) on Tue, 18 Mar 2008 10:12:51 GMT
[View Forum Message](#) <> [Reply to Message](#)

Let me describe the problem in detail before that i will share my configuration

Processor Intel Core 2 Duo 2.6 Ghz
Mother Board: Intel DG33FB
HardDisk : 160GB SATA
RAM: 6GB (2GB x 3)
OS: Centos 5.1 Server Install
Kernel Version: kernel-PAE-2.6.24-ovz002.2.i686.rpm
Kernel args: acpi=off

When i boot with above kernel, Starting Udev take a long time. It takes more than 30 minutes.

Message i c in the console is

Starting udev: Wait timeout. Will continue in the backgroup [FAILED]

when i run the same machine with less than 4GB of ram i dont have any problem, all VE's work fine.

Reading about openvz kernel for debian, i installed etch and installed the kernel but it also takes a long time

Message i c in the console is

Waiting for /dev/ to be fully populated

That means i have problem when physical ram is more than 4GB.

Some more stats of 2.6.24-ovz002.2-PAE kernel with 6GB RAM....

dmesg

```
