Thanks for reporting! It's known bug slipped into latest vzctl, already fixed in git:

<http://git.openvz.org/?p=vzctl;a=commitdiff;h=57831622490f9d7ffc781f16229d03dcf2165fdf>

You can fix it the same way on your boxes.

Its implications are rather small -- vzmigrate will not be able to detect error from vzctl set --applyconfig\_map name (which probability is close to nothing).
