Hi all,

\* I would like to login as a normal user 'vps101' on the HN

and would like to get in a situation like you get after typing "vzctl enter 101". Syncing the password would be nice but is not needed.

\* Putting "/usr/sbin/vzctl enter 101" as the shell in /etc/passwd did not did the trick for me.

\* I have this trick in a hosted vz environment, so I know it's possible, but I'm unable to replicate it...

any suggestions?

thanks,

Oneg
