Hi,

Running my Directadmin on openvz. Node runs Centos 4.6 and vps runs centos 5

In Directadmin I get the error

Error with system Quotas

setquota: Cannot get info for user quota file from kernel on /dev/simfs: No such process setquota:
Can't initialize quota on /dev/simfs: No such process setquota: Not all specified mountpoints are
using quota.

I've searched and googled but I'm not succeeding in solving this issue..

Thnx in advance..
