
Subject: [PATCH net-2.6.26 0/6][NETNS][SOCK]: Make "prot inuse" counters work per-net.

These counters show the number of sockets used for each protocol, but currently they gather global statistics. This is useful to have them work per-net.

This set adds this possibility, but hides it under CONFIG_NET_NS option, so that not-virtualized kernel keeps using the optimized version by Eric (and he's in Cc for that reason).
