Hi Harikumar,

Because of You are Virtuozzo customer I would advise You to address your questions to
Virtuozzo support Team
http://www.parallels.com/en/support/virtuozzo/

It seems for me you are truing to configure traffic shaping from inside VE. It is incorrect, You
should do it on the host system. Inside VE you cannot load any modules or have direct access to
hardware.

Thank you,
Vasily Averin
