Hello,

I try to migrate a VE, but got this error, why vzmigrate still using port 22 while I already specify other port?

```
# vzmigrate --ssh="-p 8888" -r no -v host.name.net 10
OPT:--ssh=-p 8888
OPT:-r
OPT:-v
OPT:host.name.net
Starting migration of VE 10 on host.name.net
OpenVZ is running...
  Loading /etc/vz/vz.conf and /etc/vz/conf/10.conf files
  Check IPs on destination node: xxx.xxx.xxx.xxx
Preparing remote node
  Copying config file
ssh: connect to host host.name.net port 22: Connection refused
lost connection
Error: Failed to copy config file
```

Best Regards,
Markus
