vaverin wrote on Sat, 22 March 2008 04:00It looks like following issue:
  http://www.3ware.com/KB/article.aspx?id=15243&cNode=6I1C 6S

We have fixed this issue already and I expect Kir will release new kernel soon.

Any ETA on when a kernel with this fix will be released? I've experienced no issues, but as someone with 64-bit 4GB+ RAM and 3Ware 8000 series servers it is a bit stressful to know the possibility is out there.
