---

I've also a debian 4.0 host running, with following kernel and tools

```
# uname -a  
Linux redstar 2.6.18-ovz-028stab048.1-smp #1 SMP Thu Nov 1 13:42:17 UTC 2007 x86_64  
GNU/Linux
```

```
# vzctl --version  
vzctl version 3.0.18-1dso1
```

on this system it works, but not on the rhel4 system above.

Please help us to find the problem! thx.
