I guess I am just having a different issue....

I am trying to install CSF on a VE running cpanel, and I am getting:

iptables: Unknown error 4294967295

```
LOG tcp opt -- in * out * 0.0.0.0/0 -> 0.0.0.0/0 limit: avg 30/min burst 5 LOG flags 0 level 4 prefix  
'Firewall: *TCP_IN Blocked* '
```

```
Error: iptables command [/sbin/iptables -v -A LOGDROPIN -p tcp -m limit --limit 30/m --limit-burst  
5 -j LOG --log-prefix 'Firewall: *TCP_IN Blocked* '] failed, at line 204
```

any suggestions?
