Dave, could you pls conside this addition. This should fix problem
reported by the Kamalesh Babulal <kamalesh@linux.vnet.ibm.com> recently.

[NETNS]: Declare init_net even without CONFIG_NET defined.

This seems bogus but there is no other way for now. There are several
placec when networking headers are included even without CONFIG_NET and
the possibility of the similar reports in the nearest future is great.
