
Subject: [RFC PATCH 2/4] Container Freezer: Make refrigerator always available
Posted by Matt Helsley on Thu, 03 Apr 2008 21:03:18 GMT

[View Forum Message](#) <> [Reply to Message](#)

Now that the TIF_FREEZE flag is available in all architectures,
extract the refrigerator() and freeze_task() from kernel/power/process.c
and make it available to all.

The refrigerator() can now be used in a control group subsystem
implementing a control group freezer.

Signed-off-by: Cedric Le Goater <clg@fr.ibm.com>

Signed-off-by: Matt Helsley <matthltc@us.ibm.com>

Tested-by: Matt Helsley <matthltc@us.ibm.com>

Cc: linux-pm@lists.linux-foundation.org

Changelog:

Merged Roland's "STOPPED is frozen enough" changes. For details see:

<http://lkml.org/lkml/2008/3/3/676>
