Hi

I copied the IPTABLES from the host node and tried to use it on the vps. It prompted the error below. Attached is the set of rules for IPTABLES.

```
[root@webvps ~]# /etc/init.d/iptables restart
Flushing firewall rules:                [ OK ]
Setting chains to policy ACCEPT: mangle filter      [ OK ]
Applying iptables firewall rules: iptables-restore: line 17 failed
                                           [FAILED]
```

```
[root@webvps ~]# cat /etc/sysconfig/iptables
*filter
:INPUT ACCEPT [0:0]
:FORWARD ACCEPT [0:0]
:OUTPUT ACCEPT [0:0]
:RH-Firewall-1-INPUT - [0:0]
