Subject: Re: "strong" Disk I/O prioritisation Posted by TheWiseOne on Wed, 09 Apr 2008 14:57:59 GMT View Forum Message <> Reply to Message

I/O priorities in OpenVZ are proportional share so I don't think you can do what you want. There was a dm-band project released a little while ago that provides hard limits on disk I/O bandwidth for both Xen and OpenVZ.

http://kerneltrap.org/Linux/Dm-band_Block_IO_Bandwidth_Contr oller

Perhaps you could petition OpenVZ to include this, although from what I can tell from talking to Kirill they have a full plate for the next few months.
