Thanks. It is going through HN, indeed.

I am not sure if the proposed solution answers my question. The final set up should be

HN: 111.111.111.111 - public IP
VE1: 222.222.222.222 - public IP
VEN: nnn.nnn.nnn.nnn - public IP

Will just this

vzctl set 1 --ipadd 222.222.222.222 –-save

be enough?

Slava
