Some simple helper patches to enable implementation of multiple PTY (or device) namespaces.

[PATCH 1/4]: Propagate error code from devpts\_pty\_new

[PATCH 2/4]: Factor out PTY index allocation

[PATCH 3/4]: Move devpts globals into init\_pts\_ns

[PATCH 3/4]: Enable multiple mounts of /dev/pts

This patchset is based on earlier versions developed by Serge Hallyn and Matt Helsley.
