Some simple helper patches to enable implementation of multiple PTY (or device) namespaces.

- [PATCH 1/4]: Propagate error code from devpts_pty_new
- [PATCH 2/4]: Factor out PTY index allocation
- [PATCH 3/4]: Move devpts globals into init_pts_ns
- [PATCH 3/4]: Enable multiple mounts of /dev/pts

This patchset is based on earlier versions developed by Serge Hallyn and Matt Helsley.
