gm77 wrote on Sat, 29 April 2006 17:29Kir, unfortunately, I'm not so familiar with git. I cannot find a way to extract the pure OpenVZ patchset from your git repository (it looks like the whole kernel tree is under git control).

  Resolved. I've spend last day studying GIT Now, I'm quite happy with git.openvz.org) From now on, I'm running OpenVZ enabled 2.6.16.12 with all my private patches applied.

Thanks!
