Hopefully the Wiki can help you out fully on this one:

http://wiki.openvz.org/Main_Page
<http://wiki.openvz.org/Category:Networking>
http://wiki.openvz.org/Virtual_Ethernet_device
http://wiki.openvz.org/Virtual_network_device

Looking at both pages will explain the differences. What
you're wanting is the Virtual Ethernet device..

Regards,

Chris Bennett (cgb)
