Hi Den,

Thanks for your reply.

> you'll have arp replay iff on the `_target_ node/VE`
> `ip route get 192.168.0.105 from 192.168.0.253 iif <incoming_device>`
> will return either a local route or route to a device other than
> incoming.

I don't really get you on this, are you able to elaborate?

Also, if it helps, here's the output of command you suggested above:

Working:

```
[root@sonata ~]# ip route get 192.168.0.105  
192.168.0.105 dev venet0 src 192.168.0.224  
cache mtu 1500 advmss 1460 hoplimit 64
```

Not working:

```
[root@sonata ~]# ip route get 192.168.0.105  
192.168.0.105 dev venet0 src 192.168.0.224  
cache mtu 1500 advmss 1460 hoplimit 64
```

That is, they are exactly the same.

Regards,

Chris Bennett (cgb)
