---

I was wondering if someone might be able to point me in the right direction for installing OpenVZ on a PowerPC64 SMP (G5 1.66GHz) machine. From what I've found, there is not a prebuilt kernel for powerpc64 and I therefore cannot install via "apt-get install kernel-patch-openvz" (I tried with no success). I assume I have to build the kernel with OpenVZ support, but I'm a bit of a n00b when it comes to compiling. Any help would be GREATLY appreciated!
