zenny wrote on Sun, 04 May 2008 15:47Dim: Thanks. But does the default GFS package that comes with CentOS5.1 conflicts with OpenVZ? Or there are special packages compatible with OpenVZ?

You may use default one.

Quote:

GFS is new to me. Do I need to install it only on hardware node or in the containers, too?

You need to install Containers' private over GFS partition.
