BTW, let me inform you that I also did:

yum install kernel-devel

But it installed kernel-devel.i686 0:2.6.18-53.1.14.el5 but the dependency error still persists to kernel-devel-2.6.18-53.1.13.el5.028stab053.10.

Is there any kernel-devel-2.6.18-53.1.13.el5.028stab053.10?
