Subject: 2.6.16 patch Posted by John Kelly on Sat, 06 May 2006 19:06:19 GMT View Forum Message <> Reply to Message

Hello all,

patch-026test009-combined does not apply cleanly to 2.6.16.14, but does to 2.6.16.

The date on the patch file is April 20, so presumably it does not have all the -stable updates. Does anyone know which ones are missing?

I suppose I could find out the hard way, by attempting to apply each one, but if someone else already knows ...
