Joe, depends on applications inside VEs. You can run anywhere from 1 to
100 or more.

|Subject: [Users] How many VM on a Host
|
|Hi All,
|
|With a P4 2.4GHz, 4G RAM, 300G HD - How many VMs I can expect to run on
|this machine configuration.
|Also, I'll be interested to know what other type of HW configuration
|specs others are using and how many VMs they are
|able to run - In live production sites!
