Hello,

I think you should try to install "tcpdump" inside VE to find out if any packet goes out from VE. You should listen "tun0", "venet" interfaces inside VE and at the same time "venet", "eth0" interfaces on the HN.

In this situation a could only guess what's the problem.

The only thing that's occurred to me is IP forwarding inside VE. Please, make sure that you've enabled ip forwarding inside VE.

Thank You!
