maratrus wrote on Fri, 16 May 2008 21:37Hello,

What kernel do you use?

Could you possibly describe the steps you've done and problems you've faced with. You could provide us with the exact commands, error messages or logs. Then I think somebody could help you.

Thank You!

Hello

My Kernel is 2.6.18-53.1.13.el5.028stab053.10ent

I checked this kernel config file.
I saw CONFIG_NFDS=m. it's right.
But I can't start NFS Server

If I start nfs server. it have error message

service nfs start

```
Starting NFS services:          [ OK ]  
Starting NFS quotas:          [ OK ]  
Starting NFS daemon:          [FAILED]
```

In /var/log/message

```
May 17 11:38:35 ap2 nfs: Starting NFS services: succeeded  
May 17 11:38:35 ap2 nfs: rpc.rquotad startup succeeded  
May 17 11:38:35 ap2 nfsd[8178]: nfssvc: No such device  
May 17 11:38:35 ap2 nfs: rpc.nfsd startup failed
```

If I want to use "User-space NFS server "

Then input "rpc.nfsd -r"

This is my start message

```
rpc.nfsd -r
```

```
rpc.nfsd: invalid option -- r
```

```
Invalid argument: '?'
```

```
Usage:
```

```
rpc.nfsd [-p|-P|--port] [-N|no-nfs-version] [-T|--no-tcp] [-U|--no-udp] nrservs
```

Thanks for your support.

Nick
